Resume

Front-End Engineer with over 8 years of experience in web development, mainly working with React, Next.js, and Node.js API integrations. Experienced in large-scale products within sports betting, e-commerce, and corporate platforms, using Azure, VTEX, and best practices in performance, SEO, and UX. English: Upper-Intermediate (B2).

Objective

Front-End Engineer

Experience

Jul/2023 – Atual Suprema Gaming & Co.

Worked on the development of sports betting platforms using React and TypeScript, integrating external providers such as BetConstruct. Built responsive and accessible interfaces with strong focus on UX, performance, and visual quality. Actively contributed to automated testing with Cypress, reducing bugs and improving delivery reliability. Collaborated with multidisciplinary teams (design, backend, QA) in agile environments. Also worked with AWS deployments, CI/CD pipelines, and production monitoring.

Oct/2021 – Jul/2023 Arena22

Worked on the development and evolution of the Arena22 sports betting platform using React. Implemented new features, maintained existing code, and continuously improved performance and user experience. Worked in Azure cloud environments, contributing to deployments, monitoring, and application stability.

Education

FAM – Faculdade das Américas
