Available for remote work (Brazil and international)

SUMMARY

Senior Front-End Engineer with 9 years of experience, specialized in React, Next.js and TypeScript, working end to end through Node.js and NestJS. Track record on high-traffic products across sports betting, e-commerce and automotive financing, including a 40% improvement in Core Web Vitals on a large-scale e-commerce. Currently technical lead of the front-end on the GM Financial project, writing technical specs, defining component standards and running code reviews. In parallel, I design and maintain my own SaaS products in production, from database to AWS deployment. English: B2.

PROFESSIONAL EXPERIENCE

Senior Front-End Engineer | Technical Lead

Accurate Software (contractor) | Jan/2026 - Present | Remote

GM Financial project: vehicle proposal and financing platform used by dealerships across Brazil (React, Vite, GM proprietary Design System).

Took over technical leadership of the front-end, writing detailed technical issue specs (business rules, access profiles, API contracts, acceptance criteria and affected components)

Build features in React and TypeScript on top of GM's Design System, with internationalization (i18n) and REST API integration

Standardized the technical spec structure across front-end and back-end, reducing rework and scope ambiguity

Run code reviews and define component, state and module organization standards

Co-founder & Full Stack Developer

Vela Studio | Jun/2026 - Present | Itajai, Brazil | Part-time

Own software house focused on turning operations that still run on paper or spreadsheets into custom digital products, from zero to deploy.

SuaArena: sports venue and tournament management platform in production, with 500+ tournaments completed. Live brackets, rankings, QR code check-in and real-time updates via SSE. Next.js, Node.js, MySQL, AWS (EC2, S3, Nginx, PM2)

AmeConsulta: medical imaging and reporting system in production, with DICOM/Orthanc integration to ultrasound machines and a patient portal. Next.js, NestJS, PostgreSQL, Docker, AWS

In-house Design System published as an npm package, documented in Storybook, with Tailwind CSS, Radix and design tokens

Front-End Developer

Suprema Gaming & Co. | Jul/2023 - Jan/2026 | Remote

High-traffic sports betting platforms, continuing the projects after the acquisition of Arena 22 by Suprema.

Built and evolved interfaces in React and TypeScript, integrated with BetConstruct

Worked on a product with high concurrent traffic, prioritizing rendering performance, scalability and production stability

Implemented automated end-to-end tests with Cypress, reducing regressions on every release

Built a CMS for affiliate management, performance analytics and content distribution

Maintained and deployed applications on Azure and AWS with CI/CD pipelines

Front-End Developer

Arena 22 | May/2021 - Jul/2023 | Remote

Sports betting and fantasy games platform, later acquired by Suprema Gaming & Co.

Built the platform's interfaces in React, with reusable componentization and an architecture ready to scale

Implemented Figma prototypes with visual fidelity, focused on responsiveness and accessibility

Wrote end-to-end tests with Cypress ensuring delivery quality

Worked with Azure infrastructure, monitoring application stability and performance

Front-End Developer

Accurate Software | May/2019 - Oct/2021 | Remote

Medium and large-scale projects for clients in the retail and automotive sectors.

Built the Cobasi e-commerce in React and SASS on the VTEX platform, with optimizations that delivered a 40% improvement in Core Web Vitals

Built SPet, an appointment scheduling portal for veterinary services, in React, Node.js and MongoDB

Integrated the GM Propostas system (React and Java) with insurance company APIs, CPF/CNPJ lookups and digital contract signing via DocuSign

Mentored junior developers and ran code reviews, raising the team's quality standard

Front-End Developer

Superare | Nov/2017 - May/2019 | Remote

Landing pages and web solutions for communication and telecom clients, including Claro and NET. JavaScript, SCSS, Pug (Jade), Gulp and WordPress, focused on performance and responsiveness.

Front-End Developer

Studio Visual | May/2017 - Nov/2017 | Sao Paulo, Brazil

Web solutions in WordPress and WooCommerce, with interfaces in HTML5, CSS3, JavaScript and PHP.

EDUCATION

FAM, Faculdade das Americas | BSc in Information Systems | 2018 - 2021

ETESP, Escola Tecnica Estadual de Sao Paulo | Technical Degree in IT | 2016 - 2017
